Subject: FDA Status for Rex® HT Materials – Various Colors

To Whom It May Concern:

The Rex® High Temperature HT (beige), WHT (white), RHT (red), KHT (khaki), BHT (blue), and HTB (black) materials, as supplied in Rexnord's MatTop® conveyor chains, comply with the US Food and Drug Administration test requirements as specified in FDA Title 21CFR§177.1520 (c) for polypropylene resins. The material may be used as articles or components of articles intended for direct food contact on a repeated use basis. There is no limit on the types of food that can be contacted, including meat and poultry processed under federal inspection.

This statement only refers to applicable food-contact regulations. Medical and pharmaceutical applications are not considered by these regulations.

If you have any questions please contact the Rexnord Industries, Inc. Application Engineering office at 262-376-4800.

Sincerely,

Dean A. Wieting
