

Rexnord® Industrial Chain

Rexnord® Roller Chain

Long life and extended reliability from a company serving American industry for more than 110 years

Rexnord precision roller chain products have set the standard in the power transmission industry for more than 110 years.

The most popular sizes are available today for shipment from our facilities in the United States. Manufactured in ISO certified plants, rexnord roller chain features:

- Consistent high quality
- Solid rollers for longer roller life
- Wide waist sidebars for superior fatigue strength
- Armor-cased pins for maximum wear resistance
- High temperature factory pre-lubrication for long life at high speeds
- Pre-stressed after assembly to reduce early break in wear

For more information, call 866-REXNORD

Features & Benefits

Armor-cased pins for greater wear capability. Manufactured to ANSI and Rexnord exacting standards

- **Case-hardened pin** for maximum wear life
- **Wide waist 60H & up** improves strength by minimizing bending stresses in the sidebar when under load; reduces downtime
- **Solid rollers** allow smooth rotation on the bushing and minimizes impact load as the chain engages sprocket teeth; thereby increasing sprocket life
- **Shot-peened sidebars** improve overall fatigue strength and increase chain life
- **Precision pierced holes** are critical to maintaining the overall strength of the chain; resulting in higher pin and bushing push outs and improved fatigue strength; extending chain life
- **Precision controlled heat treatment process** which is critical for performance both in wear conditions and fatigue life providing consistent, high quality
- **Automatically assembled and pre-loaded** to ensure precision components, tight tolerances and uniformity for easy installation and alignment
- **Factory prelubrication** — the most important lubrication a chain undergoes — hot dips the chains in a special lubricant which penetrates chain joints; improves chain life, whether in use or on the shelf
