

Why Choose Rexnord?

When it comes to providing highly engineered products that improve productivity and efficiency for industrial applications worldwide, Rexnord is the most reliable in the industry. Our commitment to customer satisfaction and superior value extends to every area of our business.

Delivering Lowest Total Cost of Ownership

The highest quality products are designed to help prevent equipment downtime, increase productivity and deliver dependable operation.

Valuable Expertise

An extensive product offering is accompanied by global sales specialists, customer service and maintenance support teams, available anytime.

Solutions to Enhance Ease of Doing Business

Our commitment to operational excellence means you benefit from getting the right products to the right place at the right time.

Why Choose Link-Belt Cylindrical Roller Bearings?

More Features and Options

Link-Belt® cylindrical roller bearings offer a broad range of configuration options and special features. The result is a selection of bearings that deliver the best value on delivery and performance.

A Bearing for Any Application

A broad product range utilizes case-carburizing, grade bearing steel and complex geometries, all designed to consistently perform in demanding applications. Rexnord uses high quality components and diligently manages the manufacturing process to ensure we deliver the highest quality products.

Custom Product

Highly configurable bearings allow us to utilize our assemble to-order capability to provide design flexibility for our customers. With the availability of extensive manufacturing processes, custom designs are easily accommodated.

Rugged Performer

Link-Belt bearings are a proven performer in the industry and represent the quality and value our customers have come to expect from a leader.

Link-Belt Cylindrical Bearings

- Product range up to 16" outside diameter
- Best-in-class lead times
- High and low-volume manufacturing capabilities
- Broad standard product range
- Custom capabilities to fit demanding applications
- Multiple configurations
- Multiple retainer options to maximize performance
- Bearing quality, case-carburized material

Process & Motion Control Products & Solutions For Your Business
