

## Metal Modular

Modular belting in stainless steel for optimal performance

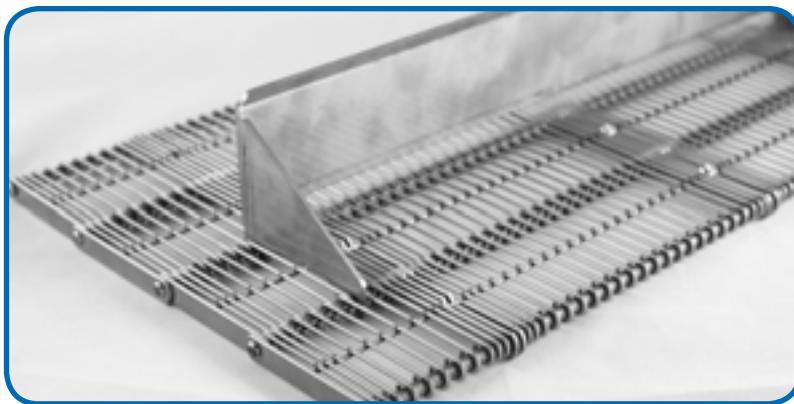

### Metal Modular

- Reduce contamination by replacing your current modular belting
- Fully customizable to meet your needs
- Reinforced for heavier loads and impact loading
- Optimal for food applications and industries

#### Advantages

- Fastener free, integrated flight design for strength, belt integrity, and to eliminate risk of product contamination
- Patented edge technology consists of denser mesh at points of distress to add additional strength and rigidity
- Exclusive rail match technology allows for drop in retrofit replacements of your current modular style belting
- Heavy duty option available to withstand harsh applications and heavy product loads or impact

#### BeltTechSpecs

- Widths up to 144" (3658mm)
- Speeds up to 100fpm (31mpm)
- Temperatures up to 400°F (204°C)
- Materials: T316SS, T304SS

Metal Modular belting is available to select markets presently, please stay tuned for updates and additional market launches.
