Rexnord 5930 Series MatTop Chain Design Upgrade

What is the scope of the change?

Rexnord now offers the Rexnord 5930 Series MatTop Chain in an upgraded design using a one link system.

What will change in the upgrade?

One Module System

The upgraded design is a one-module system which is used as center and end module and can be recognized by its cutting line on the top of the module. This ensures smooth camfer on the side. The main advantage is easy installation and maintenance and reduction of inventory.

Upgraded Width

We have upgraded the design to a nominal width of 6 inch which is 0,5% wider than the original design.

Upgraded Plug

The upgraded design uses the Rexnord 1500 Series MatTop Chain plug in the distinctive yellow color for easy identification. This plug can be easily assembled by hand and removed with a small screwdriver.

Upgraded Vacuum Design

The upgraded design is available in vacuum execution. Hole patterns might vary in comparison with the original design.

Upgraded Sprocket Design and Position

Upgraded 5935 design:

- Can run on the same sprockets as original design
- Sprocket position every 3 inch between transfer of individual link

In the upgraded design it is not possible to position the sprocket at a transfer of two modules. The sprocket will need to be positioned in the area between the module transfer.

Does this upgrade affect price and warranty?

This upgrade does not affect price or warranty.

Will there be a change in item description and part number?

The item description will remain the same. The SAP part numbers will change, please consult the table below.

When will this change be effective?

This change will be effective immediately. We will not be able to deliver the original design anymore.

Rexnord 5935 Series
 MatTop Chain

New Part Numbers

Description	Width (inch)							
	6	9	12	15	18	21	24	27
HT5935EU-XXIN	10756581	10756582	10756583	10756584	10756585	10756616	10756617	10756618
LF5935EU-XXIN	10756624	10756637	10756638	10756639	10756640	10756641	10756642	10756643

* Material numbers for other materials, widths and vacuum-versions will be supplied upon request

Plug Design

Original Design with One Side Plugs and One Side Blind

Upgraded Design with 1500 Plugs on Both Sides of the Belt
