

Rexnord 6990 Series Hybrid MatTop Chain

Breakthrough Automotive Solution

Count on Rexnord 6990 Series Hybrid MatTop Chain to support you in your automotive environment. The Series offers vast product line versatility for a wide range of demanding application needs that require tailored performance solutions.

Rexnord 6990 Series Hybrid MatTop Chain

Rexnord FlatTop continuously develops and introduces new conveyor products that meet the performance demands of the marketplace. In addition to reliable vehicle handling, automotive plants can benefit from the use of Rexnord® 6990 Series Hybrid MatTop® Chain by improving their efficiency and promoting the comfort and safety of their workers.

Supported by our Rexnord 6990 Series Hybrid Drive System, our offering of Rexnord 6990 Series Hybrid MatTop Chain includes:

- **Rexnord 6990 Series Hybrid H4 MatTop Chain** — designed for automotive conveyors with high loads or frequent load variation (people movers)
- **Rexnord 6990 Series Hybrid H8 MatTop Chain** — designed for extreme applications that require operational excellence

Read on to learn more about how we can provide our trusted expertise and partner together to offer a customized solution for your application.

Rexnord 6990 Series Hybrid H8 MatTop Chain (bottom of chain)

Rexnord 6990 Series Hybrid H4 MatTop Chain

Rexnord 6990 Series Hybrid H4 MatTop Chain

Rexnord 6990 Series Hybrid H4 MatTop Chain designed for automotive applications

Conventional automotive conveyor systems equipped with steel slat chains or rubber reinforced belts cannot be easily retrofitted with conventional plastic modular chains. Due to limitations in strength and stiffness, standard plastic modular chains cannot provide the desired performance in long and/or heavily loaded conveyors. Rexnord recognizes the importance of smooth chain operation in any type of application and has developed a 2.28-inch (57.75 millimeters) pitch and 0.7-inch (18 millimeters) thick Rexnord 6990 Series Hybrid H4 MatTop Chain, raising the performance level of plastic modular chains. The Rexnord 6990 Series Hybrid H4 MatTop Chain is designed for automotive conveyors with high loads or frequent load variation (people movers). The steel structure in the chain creates high stiffness and strength enabling the chain to be used in conveyors with lengths over 328 feet (100 meters) in applications moving people, vehicles or a combination of the two.

Rexnord 6995 Hybrid MatTop Chain (people mover example):

- 2 x 213 feet (65 meters) finish line conveyors
- 177.1 inches (4,500 millimeters) wide
- SolidTop Chain design
- FR-PA material, meeting DIN4102-B1 and ESD (Electrostatic Dissipative) specifications
- Speeds up to 25 feet (7.6 meters)/min

Conventional technology

Slat chain comparison

Current slat chain conveyors can be easily retrofitted to accommodate the Rexnord 6990 Series Hybrid MatTop Chain. This new hybrid technology offers many advantages, including: high stiffness, maintenance-free construction and chemical resistance to automotive fluids.

Reinforced conveyor belting

The Rexnord 6990 Series Hybrid MatTop Chain provides flexibility to build low profile, ultra-long conveyors with compact drive packages. This is accomplished because of a unique drive system that does not require tensioning.

Rexnord 6990 Series Hybrid H4 MatTop Chain features and benefits

Meets Regulations

Modules are available in flame retardant material according to DIN 4102-B1 (DIN EN 13501), or standard POM quality as required.

Smooth Ride

Rexnord 6990 Series Hybrid H4 MatTop Chain offers higher stiffness compared to full plastic solutions. This unique design provides a smooth-running chain, eliminating slip-stick or pulsation, ensuring a comfortable and smooth ride for workers and/or vehicles.

Maintenance

Rexnord 6990 Series Hybrid MatTop Chain consists of one standard component, enabling easy installation and operates virtually maintenance-free without the need for lubrication or tensioning on the conveyor system.

Rexnord 6999 Hybrid H4 MatTop Chain Execution

Sprockets are located to the left and right of the steel hybrid structure. The Rexnord 6990 Series Hybrid MatTop Chain provides the necessary capacity to operate on long conveyors with high loads.

Performance

Even load distribution through steel tension plates and steel pins contribute to the strength and stiffness of the chain, eliminating deformation in the hinge area. Operates with Rexnord easy steel, TwistLock® Pin Retention System.

ESD Standard

The Rexnord 6990 Series Hybrid MatTop Chain offers the lowest surface resistivity of all competitive plastic modular chains (offering $< 10^3 \Omega/\text{sq}$, according to NEN-EN-IEC 61340-4-5), protecting sensitive electronic equipment and providing a safe environment for workers.

Chain Type	Working Load (max)	Weight	Back-flex Radius (min)	Certification
	lbs/ft / N/m	lbs/ft ² / kg/m ²	in / mm	
		Hybrid H4		
BM6995H4	6,850 / 100.000	5.12 / 25.0	3.00 / 76.2	NEN-EN-IEC 61340-4-5
BM6999H4	6,850 / 100.000	5.20 / 25.4	3.00 / 76.2	NEN-EN-IEC 61340-4-5
FR-PA6995H4	6,850 / 100.000	4.75 / 23.2	3.00 / 76.2	NEN-EN-IEC 61340-4-5 DIN4102-B1 (B _R -s1)
FR-PA6999H4	6,850 / 100.000	4.83 / 23.6	3.00 / 76.2	NEN-EN-IEC 61340-4-5 DIN4102-B1 (B _R -s1)

Chain widths available starting at 12 inches (305 millimeters) up to 240 inches (6,096 millimeters) in increments of 3 inches (76.2 millimeters). Note that for different chain materials, different production tolerances apply. Please contact Rexnord for the exact chain widths as dimensions vary.

Rexnord 6990 Series Hybrid H8 MatTop Chain

Rexnord 6990 Series Hybrid H8 MatTop Chain

The Rexnord 6990 Series Hybrid H8 MatTop Chain is designed for extreme applications that require operational excellence. The strength and stiffness allows the chain to be used on conveyors with lengths up to 656 feet (200 meters), carrying vehicles up to 6,613 pounds (3,000 kilograms) per zone. Ultra-long conveyors with frequent load variation (people movers) can easily be built avoiding complicated intermediate drives.

Rexnord 6990 Series Hybrid H8 MatTop Chain design:

- On average, the hybrid chain's temperature expansion is 10% of an equivalent plastic chain
- Steel tension plates provide chain stiffness which is six times higher when compared to standard FR and ESD full plastic Rexnord MatTop Chain

Rexnord 6990 Series Hybrid H8 MatTop Chain features and benefits

Meets Regulations

Modules are available in flame retardant material according to DIN 4102-B1 (DIN EN 13501), or standard POM quality as required.

ESD Standard

The Rexnord 6990 Series Hybrid H8 MatTop Chain offers the lowest surface resistivity of all competitive plastic modular chains (offering $< 10^3 \Omega/\text{sq}$, according to NEN-EN-IEC 61340-4-5), protecting sensitive electronic equipment and providing a safe environment for workers.

Smooth Ride

Rexnord 6990 Series Hybrid H8 MatTop Chain offers higher stiffness compared to full plastic solutions. This unique design results in a smooth running chain, eliminating slip-stick or pulsation, ensuring a comfortable and smooth ride for vehicles and/or workers.

Rexnord 6990 Hybrid H8 MatTop Chain Execution

Drive
Sprockets are located left and right of the steel hybrid structure. The Rexnord 6990 Series Hybrid MatTop Chain provides the necessary capacity to operate on long conveyors with high loads.

Performance
Eight steel tension plates per 12 inches (304.8 millimeters) ensures ultra-high chain strength and stiffness. Operates with Rexnord easy steel, TwistLock Pin Retention System.

Rexnord 6990 Series Chain executions

SolidTop

Closed SolidTop surface provides a smooth finish for workers and vehicles. The SolidTop execution is the product of choice in assembly areas where tool carts must be repositioned on top of the chain surface.

SafetyTop

The SafetyTop surface is closed providing an anti-slip texture (non skid) on top of the links. The raised diamond plated surface provides additional safety in applications that are humid, greasy or wet.

Chain Type	Working Load (max)	Weight	Back-flex Radius (min)	Certification
	lbs/ft / N/m	lbs/ft ² / kg/m ²	in / mm	
Hybrid H8				
BM6995H8	11,645 / 170.000	6.18 / 30.2	3.00 / 76.2	NEN-EN-IEC 61340-4-5
BM6999H8	11,645 / 170.000	6.27 / 30.6	3.00 / 76.2	NEN-EN-IEC 61340-4-5
FR-PA6995H8	11,645 / 170.000	5.84 / 28.5	3.00 / 76.2	NEN-EN-IEC 61340-4-5 DIN4102-B1 (B ₁ -s1)
FR-PA6999H8	11,645 / 170.000	5.90 / 28.8	3.00 / 76.2	NEN-EN-IEC 61340-4-5 DIN4102-B1 (B ₁ -s1)

Chain widths available starting at 12 inches (305 millimeters) up to 240 inches (6,096 millimeters) in increments of 3 inches (76.2 millimeters). Note that for different chain materials, different production tolerances apply. Please contact Rexnord for the exact chain widths as dimensions vary.

Rexnord 6990 Series Hybrid MatTop Chain Drive System

Rexnord 6990 Series Hybrid Drive System

The Rexnord 6990 Series Hybrid MatTop Chain is designed with a unique dual purpose steel frame. Rexnord H-Style Drive Sprockets (double row tooth profile) interact directly underneath, on each side of the tension plates, resulting in optimum load transfer from sprockets to chain. The sprocket design ensures reliable sprocket engagement, allowing for long-term chain elongation without sacrificing drive performance. Sprockets are engineered to drive the chain in excess of the maximum allowable working load of the chain.

Rexnord H-Style Drive Sprockets interact with the chain directly left and right of the tension plates resulting in optimum load transfer from sprocket to chain.

Rexnord 6990 Series Hybrid Sprockets features and benefits

Dimensions

The machined Rexnord 6990 Series Hybrid Sprockets are supplied in sizes ranging from nine to 30 teeth, suitable for most applications. Contact Rexnord for larger size sprockets. Metric and imperial, round and square bores are standard.

Tooth Design

The Rexnord 6990 Series Hybrid MatTop Chain tooth design allows for the sprockets to perform under high load and adapt to chain elongation. This ensures positive sprocket interaction over the lifetime of the chain.

Materials

Rexnord 6990 Series Hybrid MatTop Chain Sprockets are machined from a wear- and moisture-resistant material that provides superior performance in severe environments. If circumstances dictate, stainless steel sprockets can be MTO (Made-to-Order) for the Rexnord 6990 Series Hybrid MatTop Chain.

Robust Design

The Rexnord 6990 Series Hybrid MatTop Chain Sprockets are designed to transfer allowable load throughout the life of the chain. Maximum pitch elongation due to hinge/joint wear is typically three to five percent. The hub width of the sprocket is engineered to effectively transfer extreme loading through the drive system to the chain.

Rexnord 6990 Series MatTop Chain Sprocket executions

One-piece sprocket design

Rexnord supplies standard solid one-piece machined sprockets. This execution is commonly used on newly built conveyors, where it is easy to mount the sprockets on the shaft before it is fitted with bearings and the assembly is mounted to the conveyor.

Split sprocket design

Split sprockets are installed to an existing conveyor for easy maintenance. Split sprockets are often installed when sprocket repair is necessary, eliminating the need to remove shaft and bearing assemblies.

Sprocket	Number of Teeth	Pitch Diameter	Maximum Square Bore Size	Hub Width
		in / mm	in / mm	in / mm
Solid				
KU6990 Hybrid T09 H-Style	9	6.649 / 168.88	2.5 / 70	1.26 / 32.0
KU6990 Hybrid T12 H-Style	12	8.786 / 223.17	4.5 / 110	1.26 / 32.0
KU6990 Hybrid T14 H-Style	14	10.219 / 259.57	5.5 / 130	1.26 / 32.0
KU6990 Hybrid T17 H-Style	17	12.376 / 314.34	7.0 / 160	1.26 / 32.0
Split				
KUS6990 Hybrid T09 H-Style	9	6.649 / 168.88	2.5 / 70	1.26 / 32.0
KUS6990 Hybrid T12 H-Style	12	8.786 / 223.17	4.5 / 110	1.26 / 32.0
KUS6990 Hybrid T14 H-Style	14	10.219 / 259.57	5.5 / 130	1.26 / 32.0
KUS6990 Hybrid T17 H-Style	17	12.376 / 314.34	7.0 / 160	1.26 / 32.0

Other bore types, sizes and number of teeth are available on request. Please consult Rexnord for more information.

Customized for Your Application

The Rexnord 6990 Series Hybrid MatTop Chain is suitable for compact conveyor construction, where avoiding deep pit requirements is important. The chain offers vast product line versatility for a wide range of applications that necessitate special or alternate performance needs.

Chain Support

The Rexnord 6990 Series Hybrid MatTop Chain runs on ESD quality UHMWPE (Ultra High Molecular Weight Polyethylene) sheets. The H4 execution is designed to work with denirug®* roller profiles minimizing headshaft tension.

Drive Performance

The steel structure is driven in line with the tension plate position. This provides optimum load transfer from sprockets to chain.

Brake Drive

The high stiffness of the Rexnord 6990 Series Hybrid MatTop Chain allows for minimal brake tension or complete elimination of the brake drive.

Return Way Design (Back)

The chain can be supported with wearstrips in the return way or portion of the conveyor.

Carry Way Design

Open area between the UHMWPE plate allows for dirt and small particles to exit the system. In assembly area applications with screws, bolts, tie-ribs and other mounting materials, trash holes can be designed into the system.

Return Way (Front)

Return rollers with a diameter of 6-7 inches (152-178 millimeters) can be used to support the chain in the return part of the conveyor.

*denirug® is a registered trademark of Denipro AG.

Rexnord 6990 Series Hybrid Chain options

Pusher elements

Automotive pushers are used to strategically position the vehicle on the chain for exhaust fume discharge, water test positioning or wash conveyors. The pusher height can be customized (1 in / 25.4 mm and 2 in / 50.8 mm are standard). The chain can be perforated to suit the application.

Tact zone marking

To indicate the work station length (tact) colored links can be used. Standard yellow links are available. These links are used to mark the sides of the chain. Color contrast indicates the edge of the moving chain in relation to the static floor for safety purposes.

Wear plates

2500

The 2500 wear plate quality is suitable for people movers without high-localized pressure between the chain and the wear plate. This quality is wear resistant offering a surface resistivity of $<10^6 \Omega/\text{sq}$ (according to DIN 53482). The sheets are suitable for dry and wet applications.

2800

The 2800 wear plate offers flame retardant PE quality suitable to be used in combination with the FR-PA chain materials. The plates meet the UL94 V0 and DIN4102-1 B1 quality in combination with the flame retardant chain materials.

3000

The top line ultra-high density 3000 wear plate is suitable to be used carrying heavy vehicles or SKIDs with an optimized wear life. Quality is wear resistant offering a surface resistivity of $<10^6 \Omega/\text{sq}$ (according to DIN 53482). The sheets are suitable for dry and wet applications.

Why Choose Rexnord?

When it comes to providing highly engineered products that improve productivity and efficiency for industrial applications worldwide, Rexnord is the most reliable in the industry. Commitment to customer satisfaction and superior value extend across every business function.

Delivering Lowest Total Cost of Ownership

The highest quality products are designed to help prevent equipment downtime and increase productivity and dependable operation.

Valuable Expertise

An extensive product offering is accompanied by global sales specialists, customer service and maintenance support teams, available anytime.

Solutions to Enhance Ease of Doing Business

Commitment to operational excellence ensures the right products at the right place at the right time.

REXNORD

Rexnord Company Overview

Rexnord is a growth-oriented, multi-platform industrial company with leading market shares and highly trusted brands that serve a diverse array of global end markets.

Process & Motion Control

The Rexnord Process & Motion Control platform designs, manufactures, markets and services specified, highly engineered mechanical components used within complex systems where our customers' reliability requirements and the cost of failure or downtime are extremely high.

Water Management

The Rexnord Water Management platform designs, procures, manufactures and markets products that provide and enhance water quality, safety, flow control and conservation.
