

Product Upgrade

Upgrade Effective:
April 2016

1500 Machined Dynamic Nose-over Bar

New 1500 Series MatTop Molded Dynamic Nose-over Bar

Rexnord 1500 Series MatTop Molded Dynamic Nose-over Bar Upgrade

What is changing and when?

Rexnord now offers a molded dynamic nose-over bar for our 1500 Series MatTop® Chain. The modular design is offered in 3- and 6-inch widths, and 85- and 170-millimeter widths. It is available to order and ship as of April 2016.

Why is this change occurring?

To provide customers with a new design that features improved chain interaction with two bearings per 3 inches (76.20 millimeters) in width and raised bearings to help reduce friction. The molded design allows for easy assembly.

What products does the molded dynamic nose-over bar support?

Rexnord® 1500 Series MatTop Modular Chain (1503, 1505, 1506, and 1553 chain).

What material is used in the nose-over bar?

Our proprietary Black Wear Resistant (BWR) material, providing heat and wear resistance.

Is the new nose-over bar interchangeable with the machined Rexnord 1500 Series Nose-over bar?

Yes.

Does this upgrade affect price and warranty?

Rexnord FlatTop continues to deliver lower total cost of ownership with the new molded dynamic nose-over bar, providing a significantly lower purchased cost compared to the machined nose-over bar. Additionally, the warranty stays the same.

Will there be a change in item description and part number?

Yes, part numbers have been created — see the table below.

Will the machined version continue to be sold?

Yes, through December 2016.

New Part Numbers

Part Number	Overall Length
10478852	6.0 in
10478945	3.0 in
10478853	170 mm
10478976	85 mm

Specification drawing for the 170-millimeter width size (part number 10478853) of the 1500 Series MatTop Molded Dynamic Nose-over Bar.
