

# 24/7/365 Service Maximizes Uptime

For more than a century, Falk Drives have been recognized for their superior quality and durability by companies around the world. The Falk V-Class® is designed to take on the toughest jobs, delivering power, durability and reliability under the most challenging conditions.

To ensure continued high performance, we back the Falk V-Class with an industry-leading 3-year warranty and provide field service technicians and engineering support around the clock.

## FALK RENEW DELIVERS THE DIFFERENCE

### Falk RENEW® – the best service record in the industry

Falk RENEW is no ordinary service program. It is the one resource you can trust to keep your drive system components operating at peak levels.

- New gears are made to original OEM specifications to ensure a long service life
- Housings are chemically dipped to remove all machining debris and prevent debris related failures
- Exterior of the gear reducer is repainted to reduce corrosion on the gear drive
- All seals are replaced with original (or superior quality) seal materials to ensure leak free operation
- All bearings are replaced with high quality, tier 1 bearings to maximize the life span of the gear drive
- All gears are checked through magnetic particle inspection to ensure long gear life
- All units receive a no-load spin test to ensure the drive is operating properly before it leaves the factory
- Ground gears and pinions are made to AGMA 13 standard
- Long-term storage preparation is provided on all units

## RENEW keeps you up and running

When you choose RENEW, you have access to a wide range of services, all designed to help you boost production. These include:

- Repair
- Field Service
- Remote Condition Monitoring
- Training
- Facility Audits
- Engineering and Technical Support
