

## Tough, reliable inching drive option

### Built for Falk V-Class™ gear drive

Engineered and built with matching toughness and reliability, an inching drive option is now available for the Falk V-Class gear drive, a line of gear drives designed for maximum uptime and durable performance.

This optional standard package will enable the Falk V-Class gear drive to offer reliable full load inching operation. This allows slow-speed operation of equipment for inspection and maintenance purposes. In addition, the inching drive option permits continuous operation of equipment in cold weather, preventing freeze-up of components when facilities are temporarily not in production.

### Streamlined design with convenient operation

When uptime matters, the Falk V-Class gear drive delivers.

- **Reliable power** – A Falk Ultramite gear drive provides reliable power and unmatched performance.
- **Compact design** – Integrally mounted to the main gear drive unit, the inching drive is coupled via an overrunning clutch.
- **Automatic engage/disengage** – For operator convenience, the inching drive automatically engages in inching operation and disengages when the main motor is operating.
- **Ready availability** – Standardized product offering allows for ready availability.
- **Safety** – Optional speed switch and backstop to ensure safe operation.

### The Falk V-Class gear drive delivers the difference

The Falk V-Class gear drive incorporates the latest advances in materials technology, engineering design and manufacturing processes to produce a tough, reliable gearbox that excels in today's demanding applications. These advancements, coupled with innovative mounting and cooling accessories, provide a reliable, sustainable gearbox that outperforms the competition. Features are built into the drive to bring customers maximum uptime in a smaller drive at a lower total cost of ownership.

With standardized monitoring and lubrication packages, 24/7 customer support, readily available spare parts and a dedicated product services team that offers on-site support, the Falk V-Class gear drive is the most reliable and lowest maintenance gearbox in the industry. This performance commitment is backed by an industry-best, 36-month warranty and ground-breaking lead time capabilities.

BORN TO LEAD. BUILT TO LAST.

## Designed to meet industry demands

The Falk V-Class gear drive sets the standard in drives with superior built-in features designed to maximize uptime and deliver more torque in a smaller design at a lower total cost of ownership.

1. **Falk Ultramite** – Heavy duty standard gear drive accepts standard NEMA or IEC motor.
2. **Rugged adapter housing provides a clean sealed environment** for the overrunning clutch and offers a robust connection between the inching and main gear drive.
3. Overrunning clutch provides **automatic engagement/disengagement** as needed for inching operation.
4. Industry trusted and proven Magnum no-leak seals **keep contaminants out and eliminate leaks** to extend the drive's operating life.
5. **Minimizes unplanned downtime and lost profitability** with the easily maintained, easy-to-monitor split-housing main gear drive design.

## Service when you need it

The Falk V-Class gear drive is drop-in replaceable for current Falk product lines and easily adapts to replace competitive drives through adaptable feet.

Our knowledgeable Customer Care team offers helpful service and support by handling all of your product, sales, order and technical needs. Hours of operation are Monday through Friday from 6:00 a.m. CST to 7:00 p.m. CST. After-Hours Emergency Breakdown Support available 24/7.
