

① **AirMax Desiccant Breathers**

The AirMax® Plus™ AM-HG includes a desiccant material that absorbs water and protects against moisture intrusion. It includes a color indicator system for easy replacement identification. In addition to the desiccant and particulate filtration, the AM-HG has an expansion chamber that isolates lubricants from all levels of ambient humidity and a check valve to ensure no excess pressure/vacuum builds.

② **Oil sample port**

Allows easy oil sampling for predictive/preventive maintenance procedures. Predictive maintenance of oil can prolong the life of your gear unit.

③ **Oil site glass with anti-foam block**

Allows you to easily verify the correct oil level while the gear drive is running. Ensuring the oil level is correct protects the gearing from overheating and unnecessary wear.

Quadrive

For A-6 mounting only, as shown

Falk Reliability Package Specifications for Quadrive Shaft-Mounted Speed Reducers

Prevent downtime. Lower costs. Increase operational reliability.

You know predictive maintenance prevents downtime, lowers costs and increases operational reliability. The Falk® Reliability Package helps with all these goals as you maintain Falk Quadrive® Shaft-mounted Gear Reducers.

A proven success among Rexnord customers, this industry-leading standardized package includes options that simplify preventive work and greatly increase efficiency. For more information, ask your Rexnord Account Executive.

- Lifetime guaranteed removal
- Patented TA bushing with mounting from one side
- 3-year warranty
- Grease-purged input seals
- Viton seals as standard

Standard reliability package

- Includes Falk Airmax Plus Desiccant Breather, oil sampling port, and oil level sight gage with anti-foam block.
- A-6 mounting kit ships separately for field installation.

Available parts for standard reliability package:

Size	Part number
5215J	7708104
5307J/5315J	7708105
5407J	7708106
5415J	7708107
5507J	7708109
5608J	7708108

Note: Chart is organized according to size.

Contact your Rexnord Account Executive for pricing options.

The following reducers can only be supplied with the AirMax Plus Breather (product number 2931427): 5107J, 5115J, 5203J, 5207J.

Kits are for A-6 mounting position only. Other positions are engineered and require additional two-week lead time to ship with reducer.

Do you need long-term storage?

Units can be treated with a long-term storage vapor-phase rust inhibitor, and have grease pack in seal cages and sealed to be airtight. All external machined surfaces are coated with Rust Veto 344.
