Unparalleled reliability for mining demands

The Falk V-Class gear drive delivers the difference

Whether you're mining coal, hard rock or aggregate, the Falk V-Class™ gear drive delivers the steadfast performance you demand. Solid, reliable, proven design backed by an industry-leading three-year warranty means this gear drive won't hold you back and will handle your most rigorous production needs. Plus, on-site maintenance when you need it ensures you won't sacrifice valuable uptime. Get the gear drive that makes the difference.

Optimal features for optimal performance

- **Falk Magnum™ seals** – Nothing slows you down like leaks. Falk Magnum seals prevent downtime, environmental contamination, fines and the headache of on-site repairs.
- **Split-case design** – Horizontal split-case design makes monitoring and maintenance easy, minimizing downtime and costly repairs.
- **Ductile iron housing** – Heavy-duty ductile iron housing withstands shockloads and provides the toughness required.
- **Thermal rating** – No matter how extreme the conditions, the advanced cooling system keeps the Falk V-Class gear drive running cooler for longer life.
- **DuraPlate™ technology** – Optional DuraPlate cooling technology controls oil temperatures in the most extreme conditions, eliminating cost and inconvenience.
- **AirMax® Plus breather** – Moisture and particle protection averts corrosion and provides high efficiency to extend total operating life.
- **Quiet running** – Advanced gear design technology results in the Falk V-Class operating significantly quieter than competitive drives for enhanced workplace safety.

Performance you desire. Support you need.

- **We've got you covered** – Our knowledgeable CustomerCare team offers locally based, worldwide service and support, whenever you need it.
- **Comprehensive aftermarket support** – Aftermarket services include genuine Falk service parts, remanufactured gear drives, field service, installation assistance and complete in-place repair and rebuild.
- **Trustworthy engineering** – Manufactured in the USA, backed by a world of resources. When you know what goes into your drive, you can rely on what you'll get out of it.
- **Manufacturing expertise** – More than 100 years of experience and installed base. Our U.S.-based engineering and technical support team can answer your questions on the spot and provide maintenance on-site worldwide.
- **4-week delivery time** – Quick delivery takes the question mark out of when your gear drive will be up and running.

Horizontal split housing makes it easy to maintain bearings and gearing.

Durability you can trust.

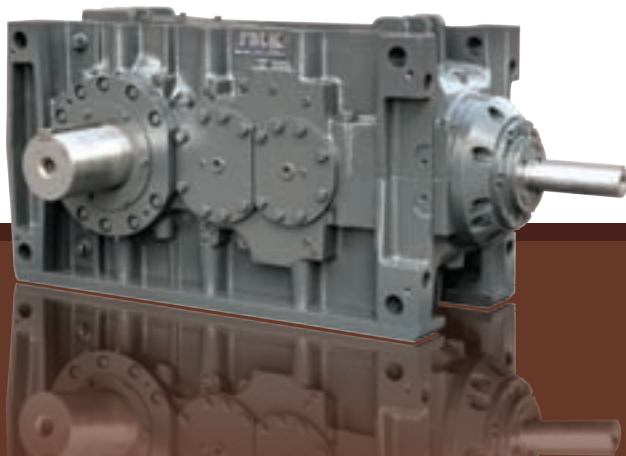

Call 866.REXNORD or visit www.falkvclass.com today to learn more about how the Falk V-Class gear drive is revolutionizing the mining industry.

Superior thermal technology keeps drive cooler than AGMA standard.

BORN TO LEAD. BUILT TO LAST.
